

AN

ENERGY-OPS SECURITY AGORA OVERVIEW

AGORA NEXUS

WHAT IS THE ENERGY-OPS SECURITY AGORA INITIATIVE?

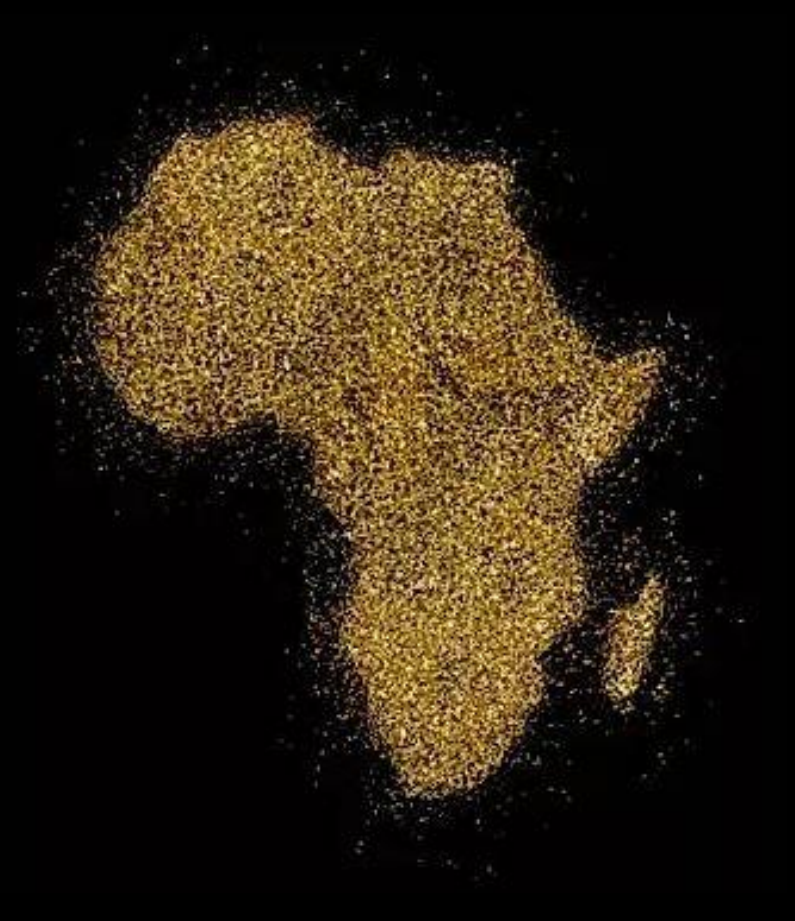

The objective of the closed door Energy-Ops Security Agora initiative is to bring together security heads and senior players within the full supply chain of the Oil & Energy sector to address the security issues and challenges to operations.

Within West Africa as we are all aware the security problems is a major burden to the Oil & Energy industry, through cost, disruption to operations, increase production cost and also can be detrimental to international interest.

Alongside the end user delegates we also incorporate a select number of aligned vendor solutions relating to the challenges and concerns highlighted.

We are officially endorsed and supported by the African Energy Chamber:

<https://energychamber.org/2019/12/04/african-energy-chamber-endorses-energy-ops-security-agora-as-key-platform-to-discuss-the-physical-security-of-africas-oil-energy-sector/>

HOW THE AGORA AGENDA AND PROGRAMME IS BUILT?

EACH PARTICIPANT HAS A CALL TO QUALIFY THEIR ROLE AND INVOLVEMENT WITHIN SECURITY

DURING THE BUILD WE DISCUSS WITH EACH INDIVIDUAL THE CURRENT ISSUES BEING FACED AND WHAT SHOULD / NEEDS TO BE ADDRESSED

ONCE WE HAVE A DEMOGRAPHIC OF THE TOPICS THE AGENDA IS FORMULATED SO WE ADDRESS REGION CHALLENGES VS. GLOBAL TRENDS

Our Format (Under Chatham House rules)

5-6 x 45-minute interactive sessions per day

Structured strictly for time keeping - 15-minute Use Case Overview from moderator, 30-minutes community debate

Additional – we will collate unreferenced key takeaways from each of the sessions and aid the community with assisting roadmaps and workflows around the best practices in implementing the strategy for overcoming each use case as a reference point and benchmark for each Agora gathering.

In addition the agenda includes, welcome and mid-morning coffee networking, group lunch as well as post event drinks into the early evening.

PREVIOUS AND CURRENT TOPIC SUGGESTIONS INCLUDE:

- Piracy

TESTIMONIALS

Jean-Marc Ricca - MD West Africa, BASF

"I like the format very much and the ability to connect with people and companies I would not necessarily meet. Of course it is difficult to build a content which would be 100% relevant but the topics essentially delivered on my expectation.

I also like the concept of building communities. Some topics are strategic in nature and we need to bring forces together to address them"

Joko Olanitori - Asset Security Advisor, Shell Nigeria

"The Speakers demonstrated in-depth knowledge and experience on the topics presented at the different sessions. There were rich and purposeful discussion that could be progressed as solution to some of issues highlighted. The two days session afforded me the opportunity to learn, focus, discuss and share useful information with colleagues to better improve security in Nigeria and African in general.

Nelson Wilbert - HSE & Security Director, Schlumberger

"This was another successful, informative and networking platform for security managers and beyond. I am particularly pleased with the mix of new solutions interlaced with deeper-dives on shared challenges. I look forward to the next event!"

Richard Emuovhe - Security Advisor, Ocean Deep Drilling ESV Nigeria Limited (ODENL)

"The sessions which were spread out over two days were well thought out and presentations by resource persons comprised new knowledge on the different topics. There was much to learn from the case studies and applicability."

TESTIMONIALS

**Emmanuel Anyanwu - Security Advisor,
Midwestern Oil & Gas**

"The kidnap presentation was my biggest catch and has further deepened my knowledge of kidnap management Social Engineering and community engagement as a strategic tool for reducing pipeline incidences in the Niger Delta, was beneficial and had further broaden my perception to seeing a better way fo dealing with CSR for asset protection. Due to this, I am going to make sure my Head of Services, Head Community Affairs and Head, External Affairs attend the next meeting."

Olajide Ishola, COO, Pan Ocean Oil Corporation

"Very Educative, opportunity for Interaction with other security professionals"

Widi Liman - Senior Security Advisor, Forte Oil

"It was a nice experience and I was also able to expand my network as well as gain a lots of things that can greatly add value to my professional carrier in the industry. The programme is apt and time in view of the myriad of security challenges affecting the Oil and Gas sector in Nigeria. Discussions was fantastic and at the end of the day, workable short, medium and long term solutions that are aimed at mitigating and or minimising these challenges were arrived at."

Ekponsi Ekponsie - Head of Security, CAMAC

"It was a really great outing and the discussions were great. Our problems are unique but we can learn from case studies outside the country and other successful solutions.

You did a great job Phil, first outing and there was so much to learn and great networking opportunity. Thanks"
